

Exeter International Airport SAFETY POLICY - GENERAL

The primary purpose of the Safety Policy is to manage safety in all areas so that accidents and incidents are avoided.

Exeter and Devon Airport Limited recognises and accepts its responsibility to ensure, as far as is reasonably practicable, that the Airport and its Air Traffic Services are safe for use by aircraft. This policy also provides for a safe working environment for all employees and others whilst on Exeter International Airport premises.

The Board of Directors of the Company recognises and accepts its responsibilities as an employer for providing a safe and healthy workplace and working environment for all of its employees. This will be achieved by the following means;

- The implementation of a safety management system to meet the requirements of OHSAS 18001:2007
- Complying with or exceeding all relevant legislation and regulatory requirements. Industry good practice will be followed whenever reasonably practicable.
- Maintaining the continual improvement of the Safety Management System as a structure to manage, supervise and action all aspects of aircraft operations, which fall within the licensee's area of responsibility.
- Ensuring a culture of injury prevention and ill health across all areas of the operation
- By Committing to setting safety objectives to continually improve the safety culture of the airport.
- Ensuring that the equipment and facilities provided are adequate to ensure the safety of all aerodrome users.
- Provision of adequate resources to ensure that all users of the aerodrome can do so, as far as reasonably practicable without risk.

Whilst all operators and managers of companies that are engaged in aircraft operations have specific responsibility for safety, Exeter and Devon Airport Ltd, as licensee and landlord has responsibilities to ensure safety (in the widest sense) on its premises. Whilst not detracting from or diminishing the responsibility of others, Exeter International Airport will require of all its service partners, contractors and tenants, to have safe working and operating practices and will encourage the adoption of industry best practice.

This policy will be reviewed annually and updated accordingly by the Managing Director. It shall be made available to all members of staff via notice boards and the Airport's intranet and be available to the public and all interested parties through our website: www.exeter-airport.co.uk

Jamie Christon
